### **DETAILED ACTION**

In a response dated 12/17/2007, applicant elected without traverse Group I, Species C,—which applicant named a method of surgery, related to Fig. 24, and subspecies Group II, Species C. Claims 39-49, were not mentioned, but it is believed the apparatus claims 39, 41-45 are directed to the nonelected inventions. Therefore, claims 1, 2, 10, 11, 27-37, 40 and 46-49 are pending.

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, a surgical method for placing a temporary embolism filter in the bloodstream, drawn to 606, subclass 108.

Group II, claim(s) 10 and 11, a method of using an expandable valve prosthesis, drawn to 623, subclass 1.17.

Group III, claim(s) 27-31, 40, 46-49 a surgical method for placing a prosthetic valve during cardiac rhythm, drawn to 606, subclass 7.

Group IV, claim(s) 32, a generic surgical method to be performed on the native cardiac valve, drawn to 604, subclass 32.

Group V, claim(s) 33, drawn to a method of using a prosthetic heart valve by disrupting the valve, drawn to class 623, subclass 2.11.

Group VI, claim(s) 34, drawn to a method of replacing and resecting a native heart valve, 604, subclass 32.

Group VII, claim(s) 35 and 36, drawn to a method of overlaying and affixing a prosthetic heart valve, drawn to class 623, subclass 2.11.

Group VIII, claim(s) 37, drawn to a method of resecting native cardiac heart valves, 606, subclass 167.

2. There is no inventive concept linking the groups that, *a posteriori*, has been found to be novel. Applicant is advised to elect a single group of inventions or amend the claims to include a general inventive concept that so links the claims.

3. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;

- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Art Unit: 3774

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JONATHAN R. STROUD whose telephone number is (571)270-3070. The examiner can normally be reached on Monday through Friday, 8:30 a.m. to 6 p.m..
